

The Sidereal Astrologer Robert Augustus Marriott II

Will reference the **star** location using the **Fagan/Bradley Ayanamsa** for the correction of precession. ["That is the tilt of Earth's axis that deviates from the Equinoctial Points by another degree° every 72 years approximately"].

This is also **approximately 4 minutes of time for 1° of the Ascendant Angle**, and that is generally associated with the **1st House Cusp Angle** that is really not the same as the **Ascendant Angle**, thing technically indicating.

Time that is Unknown

The →**UNKNOWN Birth Time**← renders the astrological relocation, and maps of the line crossings useless with this variable. **Aries House System**, or another stellar point is feasible (like **Solar Houses**, etc.).

The →**UNKNOWN Event Time (birth time is event time)**← renders the astrological relocation, and maps of the line crossings useless with this variable. **Aries House System**, or another stellar point is feasible (like **Solar Houses**, etc.).

Time that is Known

The →**KNOWN Birth Time**← Will allow specific & detailed services available, and the Astrological Maps of line crossings regarding relocation (locality) Astrology is available.

The →**KNOWN Event Time (birth time is event time)**← Will allow specific & detailed services available, and the Astrological Maps of line crossings regarding relocation (locality) Astrology is available.
