

Quick Reference Layout for the 1,728 Sub-Dwads – Quadrants – Elements - Parameters

This is a useful reference for the 1,728 Sub-Dwadashamsa used by some Astrologers who also vary on the starting point. Each Image is a quadrant, each element is colored to represent the association used by Astrologers throughout the world. Each Dwadashamsa has a parameter of 2°30'00" continuing throughout each sign. Then each Dwadashamsa is divided into twelve 0°12'30" increments that create the Sub-Dwadashamsa used by very few throughout the Astrological community.

Example of this, my own ☉ 7°58'32" is the 4th Dwad Cancer (Since ☉ 7°58'32" is between 7°30'00" and 10°00'00") while the Sub-Dwad is 3rd Sub-Dwad (Gemini). That would be Scorpio-Cancer-Gemini (8th-4th-3rd) Water-Water-Air (Mars-Moon-Mercury) for a deeper clearer perspective of awareness. All that Water Element with Air Element is going to make for communicative moods of an emotional type of outward expression, and the natural house associations add some details. A communicative nature about the moods expressed, and further in detail when blending with the 8th associations that are Scorpio-Cancer-Gemini that is radiated outward. It gets easier as you learn to work with it, and it will really bring forth a deeper awareness of what is happening especially with aspect energy transiting the (Natal or Relocated) Chart.
